You Are Welcome To Use The Plan Most Convenient For You

1 CASH ORDER

Remittance Enclosed

C. O. D.

Include CHECK, POSTAL NOTE or MONEY ORDER to the full amount of your order. By doing this you will save paying C.O.D. and collection charges. Be sure to register ALL LETTERS CONTAINING CASH.

Just mail us your order marked C.O.D. You can then pay your postman or express agent when the goods arrive in your town. There will be a small C.O.D. collection fee to be paid.

LAY-AWAY PLAN-

A ten dollar (\$10.00) deposit or more will reserve your selection of any items in this catalogue. You will receive a receipt immediately showing items reserved, amount deposited and balance owing.

Try to make convenient payments each month. You will find that it will be no time at all until your selection is paid up and delivered to you.

So if you are unable to make full payment now, be sure to send in your LAY-AWAY deposit TODAY. In this way you will be sure of saving many dollars, and you will be assured of having the gun or other equipment WHEN YOU WANT IT. When ordering your rifle or shotgun, ask us to reserve ammunition and general hunting accessories for you.

LAY-AWAY NOW – GUARANTEE DELIVERY
NO INTEREST TO PAY – NO CARRYING CHARGES
OUR ADVERTISED SALE PRICE IS ALL YOU PAY

TRADE-IN

Yes! Why not Trade-In your old used gun. It is likely worth considerable money on the new equipment you have always wanted. All Trade-In guns are valued by us at their estimated resale price. So you are almost certain to be well pleased with our liberal allowance.

Just forward your gun to us express collect. We pay the incoming shipping charges. DO NOT write us describing the gun for we CANNOT give an estimate in this way. We must be able to inspect your gun before giving a valuation. Pending your approval of our valuation, your new selection will be held aside for you. If our valuation does not meet with your approval your gun will be immediately returned to you.

JUST FOLLOW THESE SIMPLE STEPS

A—Ship or bring your Trade-In gun to our head office—Sydney I. Robinson Fur Co., Winnipeg.

B—You will promptly be notified by us, as to the value of your TRADE-IN gun.

C—After you approve our valuation just instruct us how you wish your new merchandise delivered. You may wish to send in the balance of money to complete payment, or you may prefer to have the new goods sent to you balance C.O.D. or you might like to leave your trade-in credit with us as a deposit on our "Lay Away Plan."

REMINGTON SHOT GUNS

"WINGMASTER"

12 GAUGE — TAKEDOWN

30-in. Barrel Side Ejection MODEL 870 AP

The "Wingmaster" Model 870 is a pump gun of superior quality at a moderate price. The "Wingmaster" offers many startling new features, establishing a standard of performance, value and quality by which all guns of this type will be judged in the future. Attractive appearance—streamlined trigger and positive operation. The barrel and breech block lock together for instant interchangeability of barrels. Deuble action bars for greater strength and positive operation. The barrel and breech block are locked together for utmost safety. Light snappy trigger pull. Chambered for 2% inch shells. Side ejection. Cross-bolt safety. Top of receiver matted. Take-down. Hammerless. Solid breech.

"VARI-WEIGHT" PRINCIPLE—Now for the first time, you can have three guns in one. The "Wingmaster" Model 870 (12 gauge only) is furnished with both a 3-shot 12-oz. steel "Vari-Weight" plug and the regular 3-shot wooden plug at no extra charge. By varying these plugs you can have (1) A light weight 5-shot capacity gun (about 7 lbs.) without any plug. (2) A light weight 3-shot capacity gun (about 7 lbs.) with the wooden plug. (5) A medium weight 3-shot capacity gun (about 7% lbs.) with "Vari-Weight" plug.

sway, no ramp, absolutely dead level from end to end of barrel—a true sighting plane.

Better sighting with this new solid raised rib; better shooting. Weight about 634 pounds in 12 gauge: Five shot capacity—plug furnished to conform to 3 shot federal Migratory Bird Law. Chamber length 12, 234 inches at heel. Full pistol grip with gripcap. Hand checkered stock. Duck and pheasant scenes on both sides of receiver.

ITHACA MODEL 37R SOLID RIB GRADE REPEATING GUN Quick Takedown

WINCHESTER SHOT GUNS

The mere words "Model 12" immediately identify this famous Winchester hammerless repeater to any sportsman, so deeply has it etched itself in the mind of the American shooter over the past 40 years.

Known, above all else, for its close, hard shooting, Model 12 is a universal favorite for wildfowl and upland game, at the traps or on the skeet field. So well does this gun shoot, handle and work that, for years, critical experts representing every branch of shotgun shooting, have pronounced it "The Perfect Repeater." Only the finest gun steels are used in the manufacture of this outstanding shotgun and the rugged simplicity of its operation is particularly suited to fast shooting; long and trouble-free performance. Finish and proportion of all parts give Model 12 an unsurpassed sleekness. Its fine balance, pointing and swinging qualities are evident the moment it's in your hands or thrown to the shoulder. Receiver is one piececlosed at rear. Breech bolt is short and solid. Positive crosslock safety and triple safety reloading mechanism. Take Down system the ultimate in ease and simplicity.

Barrel-Winchester Proof-Steel. Noted for strength, uniformity and pattern performance. Chambered for 23/4-in. shells.

Stock-Pistol grip stock and slide handle of American walnut. Approximate length of pull 14-in.; drop at comb 1½-in.; at heel 2½-in.

Action—Lightning fast Winchester jam-proof slide action.

Magazine—Tubular magazine holds five shells. Furnished with magazine plug to reduce capacity to 2 shells.

Safety-Positive cross-lock safety operating horizontally across front of trigger guard.

Overall Length-491/4-in. with 30-in. Barrel. Weight 7-lbs. 7-oz.

MODEL 12 HEAVY DUCK GUN

12 GAUGE -**TAKEDOWN**

DELIVERED

The changed wildfowl shooting conditions of today have in most instances sharply increased yardage from gun to game. Meeting the needs of sportsmen shooting under these conditions with the assurance of clean kills—is the Winchester Model 12 Duck Gun. Heavier than the field style, and chambered for 3-inch shells, it is unequalled for long range shooting at geese, brant, ducks, turkey and fox.

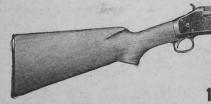

SPECIFICATION-Barrel-30-in., full choke Chambered for 3-in. or 23/4-in. shells. Take Down Stock-Pistol grip stock and slide handle of American walnut with rubber recoil pad. Approximate dimensions: Length of pull, with pad, 135%-in.; drop at comb, 1½-in.; at heel, 2%-in.; pitch down, 2½-in. Magazine—holds 5 three-inch shells. Wooden magazine plug furnished to reduce capacity to 2 shells. Weight about 8-lbs. 11-oz. Overall Length 48¾-in.

MODEL 25 12 GAUGE - SOLID

Model 25 meets the widespread demand for a well-built, thoroughly reliable, hammerless repeating shotgun with fine handling qualities . . . at a popular price. Of traditional Winchester quality and craftsmanship, its handsome appearance, smooth action and durability have made it highly popular with a host of sportsmen who want an all-around hard-shooting shotgun. Made in 12-gauge only, it is offered

with 28-inch carefully bored barrel with full choke. Chambered for 2¾-in. shells. Its world-famous Winchester slide action is simple, rugged and lightning fast. Pistol grip stock and slide handle are of American walnut. Magazine holds four shot shells. Furnished with wooden magazine plug to reduce magazine capacity to two shells. Weight about 7½-lbs. Positive cross-lock safety.

MODEL 97

12 GAUGE VISIBLE HAMMER — TAKEDOWN

by raising the hammer with thumb. Winchester proof-marked plain barrel furnished in 30-in. full choke. Chambered for 2¾-in. shells. American walnut pistol grip stock and slide handle. Length of pull 13%-in.; drop at comb 1%-in. at heel 2%-in. Magazine holds five shells. Magazine plug furnished. Weight about 73/4-lbs.

DELIVERED

Smokeless powder was new when Model 97 dropped its first duck and powdered its first clay bird. Since then, it has kept right on showing other guns how to shoot... its popularity high as a wildfowl, turkey, fox and deer gun... and as a farmer's favorite. With hammer at safety half cock, gun is securely locked and can be kept loaded with six shells, without strain on the mainspring, yet ready for a shot simply

NEW WINCHESTER SHOTGUNS

SEMI-AUTOMATIC 12 GAUGE — FULL CHOKE

MODEL 50

DELIVERED

SPECIFICATIONS

Action—Self-loading (semi-automatic). Shoots as fast as you pull the trigger. Interrupted trigger; absolutely no chance of this gun going full automatic

Capacity—Three shots. One shell in chamber, two in magazine.
Barrel—Bored from a single bar of Winchester Proof-Steel. No thin spots. Absolutely uniform in thickness from breech to muzzle. Receiver—Milled from a single brawny block of tough Winchester Proof-Steel. The receiver of the Winchester Automatic can't wear out; will last

Safety-Time-tested and proven Winchester cross-bolt safety.

NOTICE! Because of the exacting care, hand craftsmanship and rigid inspections involved in producing Winchester firearms, the supply of Winchester Model 50 Automatic shotguns is limited at present. As our quota of guns from the factory is very small this year, you should order early to be sure of getting your shotgun.

The all-new Winchester Model 50 Automatic shotgun works through an entirely different and revolutionary principle. When the Winchester Automatic is fired, the barrel remains stationary, fixed, rigid. The chamber moves back a fraction of an inch and starts the action on its way. Surely and smoothly, the Winchester easy-action Automatic flips out the empty and picks up a loaded shell, and you're ready for a really fast second shot. The easy, positive action of the Model 50 does its fast, smooth job every time, in spite of weather, weed-seeds or dirt.

Easy to Field Strip and Put Together.

Can't be put together wrong; you can put it together or take it down without tools. Directions are simple and easy to folow.

12 GAUGE DOUBLE BARREL 28-in. or 30-in. Barrels

MODEL 24

DELIVERED

This sturdy, fine shooting, moderately priced double barrel shotgun is a real Winchester in all essentials of material and workmanship. Barrels and all metal parts of high grade steel: frame made from solid forging-extra strong. Its fine handling qualities, superior design and balance are evident the moment it's in your hands. Firing pins retracted by opening

movement of the top lever, insuring easy action. Precision bored matted rib barrels. Pistol grip stock with semi-beavertail forearm of American walnut. Length of pull 14½-ins, from front trigger, drop at comb 1½ ins.; at heel 2½ ins. Double trigger action. Weight, 12-gauge about 7½

MARLIN 12 GAUGE OVER UNDER SHOTGUNS

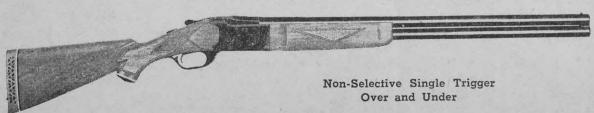

MODEL 90DT

DELIVERED

For the sportsman who wants an all-around shotgun, the Model 90DT will answer the purpose ideally. With the proper barrel length and borings, it's perfect for upland game and duck shooting as well as for trap and skeet shooting. Amazingly simple and easy in operation, this fine gun is built for a life-time of dependable use. Points easily, handles fast. Beautifully proportioned and perfectly balanced. Chambered for 2%-in. shells only. Barrels of Special Analysis Steel. Top barrel Matted, giving Single Sighting Plane. 12-Gauge barrel 30 inches. Boring—30-in.

Here's great news for shotgunners who are looking for an Over & Under Shotgun in single-trigger. Built with the same fine design and engineering as the 90-DT, it offers many features that will appeal to skeet, trap and field gunners. Standard equipment includes English type forearm,

barrels: Top Full Choke, Bottom Modified Choke, Hammerless action, cocks on opening, Positive, automatic safety. Easy to take-down for cleaning and oiling. Front trigger fires bottom barrel. Direct-line locking, one-piece frame. Stock and forearm of seasoned walnut, specially finished and expertly hand-checkered. Large, hand-filling forearm designed to protect hand from barrel heat. Full pistol grip stock Stock dimensions: Length about 14¼ ins., drop at comb about 1½-ins., drop at heel about 2¼-ins. Weight: 12-gauge about 7 lbs.

MODEL 90ST

DELIVERED

hand-checkered forearm and grip, full pistol grip with medallion and rubber recoil pad.

It is available in 12-gauge only. 12-gauge barrel lengths 30 inches. Boring, 30-in. barrels: Top barrel Full Choke, Bottom barrel Modified Choke. In limited supply only.

SEMI-AUTOMATIC SHOTGUNS

Automatic loading mechanism on both Standard and Lightweight models functions perfectly with either light or heavy loads. Friction rings provide quick, simple adjustments to give proper spring tension with various loads.

12 GAUGE or 16 GAUGE

TAKEDOWN HAMMERLESS 5 SHOT

Savage — and only Savage — offers you two smartly streamlined automatic loading shotguns—each model exactly fitted for your kind of shooting. For use in the blind and for shooting high flying ducks and geese. Model 755 Standard has added weight to reduce the recoil from highest velocity loads. For upland game hunting, you'll want the lighter, easier carrying, quicker pointing Model 775 Lightweight.

MODEL 775

Light Weight

MODEL 755

Standard Weight

DELIVERED

DELIVERED

THE MOST IMPORTANT DEVELOPMENT IN SHOTGUNS IN YEARS!

Change pattern at will, instantly—all settings positive, with clear, visual designation. Now you can have, instantly, exactly the choke you want—Full, Modified, or Improved Cylinder (or any point in between)—by a twist of the fingers. The C-LECT-CHOKE is an ingenious device attached at the factory. Choke and gun come as one unit—precision engineered and perfectly coorlinated.

And these beautiful guns—with ventilated barrel to reduce recoil and muzzle jump, with custom-type Monte Carlo stock in genuine walnut, with ingenious thumb-operated safety device, with detachable 2-cartridge clip—are available for less than most repeating, "one-choke-only" shotguns.

Specifications: Same as Model 190 on previous page

WINCHESTER Model 70 RIFLES

SEVEN FAMOUS CALIBRES

375 H & H Magnum

300 H & H Magnum

• 220 Swift 30-06 Springfield • 270 Winchester

• 257 Roberts • 308 Featherweight

Considered by many the highest attainment of the riflemakers art, Model 70 is unsurpassed for long range work and for hunting where the utmost reliability, strength, accuracy, durability and ease of operation are required. It is furnished in the selection of calibres shown at right suited for the largest or the smallest of all game and varmints. Its cartridges include a wide selection of the most popular loads. Barrel and receiver are of Winchester Proof-Steel—finest and hardest of gun steels. Stock and fore-end are of fine-grained American walnut expertly finished. Balance, supremely strong, flawless action and perfection of every detail to meet modern requirements make this without question the finest bolt action repeating rifle ever to bear the name of WINCHESTER.

SPECIFICATIONS. Barrel—Round tapered Winchester Proof-Steel in lengths listed at right. Bored rifled, chambered and lap finished to highest Winchester standards. Stock—Sporting type pistol grip stock of American walnut with full well-shaped fore-end and grip nicely checkered. Approximate length of pull 13½ inches; drop at comb 1% inch. Steel butt plate checkered. Action — Cocks on opening lift of bolt. Bolt instantly removable. Famous Winchester Speed Lock. Safety—Three position safety enables you to be ready for a shot at any time. On safe, both firing pin and bolt are fully locked. Intermediate position locks firing

pin but not bolt, permitting action to be worked. Magazine—Staggered box type with hinged floor plate for convenient access for emptying or cleaning. Holds five cartridges except in 300 H&H Magnum and 375 H&H Magnum, 4. Sights—Bead front on forged ramp base with removable sight cover; Winchester sporting rear. Receiver drilled for several popular micrometer receiver sights and scope mounts. Equipment—1-inch swivel bows. Weight—about 8 lbs. in 30-06 Springfield. Overall Length—44½. Barrel Lengths—308, 22-in; 30-06. 270, 257 Roberts, 24-in; 375 Magnum, 25-in.; 220 Swift, 300 H&H Magnum, 26-in.

WINCHESTER Model 94 CARBINES

30/30 or 32 SPECIAL CALIBRES

DELIVERED

Probably more deer have fallen to this World-Famous lever action Winchester in the past 50 years than to all other rifles combined. Easy to carry and handle—utmost dependability—have made this rugged, fast operating carbine a universal choice as an ideal timber rifle or saddle gun. Moderate in price. Weighing only 61/4 lbs., Model

94 comes up in a flash. Its lever action is so smooth and fast that a simple movement of the finger lever withdraws the breech bolt, ejects the empty shell, cocks the hammer and throws a new cartridge into the chamber. When closed, the action is securely locked by a block of steel which entirely covers the rear of the breech bolt. The visible hammer has a safety notch at half cock—an important feature in timberland hunting. Furnished in one style only in 30-30 Winchester or 32 Winchester Special calibres.

SPECIFICATIONS: Barrel—20-in. tapered of Winchester Proof-Steel. Stock—Straight grip stock and forearm of American walnut. Checkered steel butt plate. Approximate dimensions: Length of pull 13-in., drop at comb 2-in., at heel 25%-in. Action—Winchester lever action with visible

hammer and safety notch at half cock. Magazine—Tubular type holding 6 cartridges. With one in chamber, Model 94 is a seven-shot repeater. Sights—Bead front on ramp with removable sight cover, Winchester sporting rear sight. Overall Length—37% in.

WINCHESTER Model 64-30-30 RIFLES

DELIVERED

SPECIFICATIONS: Barrel—24-in, round tapered of Winchester Proof-Steel. Stock—Pistol grip sporting type with semi-beavertail forearm of American walnut. Approximate length of pull 13-3/16 in., drop at comb 1-13/16 in., at heel 2% in. Action—Famous Winchester lever action with visible hammer and safety notch at half cock. Magazine—Tubular type two-thirds magazine holding five cartridges. Sights—Bead front on forged ramp base with removable sight cover, Winchester sporting rear sight. Receiver drilled and tapped for Lyman 66 and other receiver sights. Weight—About 7 lbs. Overall Length—42 in.

WINCHESTER Model 71-348 Cal.

Strongest Lever Action Ever Built

STANDARD MODEL ONLY

Standard Model does not include sling, receiver sight or checkering.

Model 71 has been acclaimed by gunsmiths and expert shooters as the fastest strongest lever action ever built. Known for its design, balance, fit and rugged construction, it has stood the test of years under the most gruelling conditions. Chambered for its own high efficiency cartridges in one caliber only—348 Winchester, Model 71's record on all North American big game is truly remarkable. The 348 velocity with medium to abundant bullet weight. Barrel, 24-in. tapered of matchless Winchester Proof-Steel. Sporting type pistol grip stock and semi-beavertail forearm of American walnut. Weight about 8 lbs. Smooth strong lever action has visible hammer with safety notch at half cock. Tubular type magazine holds 4 cartridges. Sights: Bead front on forged ramp base with removable sight cover, 22K Sporting rear sight.

MODEL 121A \$**59**.50

DELIVERED

SPECIFICATIONS

"STANDARD" GRADE. Slide action, takedown, hammerless, solid breech. 24 inch round, tapered barrel. American walnut stock with shotgun style butt plate, checkered to prevent slipping. Half pistol grip. Semi-beavertail type fore-end, grooved for firm handling. Chambered to take without adjustment 22 Short, 22 Long and 22 Long Rifle higher speed and standard velocity cartridges. Magazine holds 20 Short, 15 Long or 14 Long Rifle cartridges. Step adjustable sporting rear sight. White metal bead front sight. Length over-all 41 inches. Length taken down 27½ inches. Weight about 6 lbs.

The Remington Slide Action has always been superior for smoothness of operation and reliability under every shooting condition. Accurate to the dot—and lightning fast—you can cut this repeater loose and rattle out the bullets so fast it reminds you of a pneumatic riveter. Be sure to note these features in th Model 121 next time you're thinking of buying a new 22 rifle. Long Barrel for accurate sighting radius and steady holding. Mounted white metal bead front and step adjustable rear sights.

Semi-Beavertail Fore-end, long and well rounded to fit the hand. Aids fast handling for quick shots at running game. Fits man or boy. Grooved to prevent slipping.

Lightning-Fast Action works smooth as silk. Short stroke adds speed to operation. Action release in front of trigger guard permits unloading without firing.

Easy Take-Down with thumb screw. No tools required. Packs conveniently in a suitcase. Length taken down, 27½ inches.

Cross-Bolt Safety for left or right-handed shooters. Quickly and conveniently operated with the trigger. Trigger pull is light and crisp for easy and accurate release.

Pistol Grip designed for hetter control over each shot fired. Fits the hand so comfortably the shooter has a firm hold on the stock. Also places the finger well forward around the trigger. Shotgun Style Butt Plate speeds up sighting on quick shots. Checkered to prevent slipping. Aids in steady holding and comes up quickly to your shoulder from any position.

NEW BROWNING 22 CAL RIFLES

MODEL 2200

DELIVERED

22 Long Rifle Cal. TAKEDOWN Semi-Automatic Rifle

DELIVERED

This .22 Automatic Rifle is built on simple lines with the finest workmanship possible by Browning. Instant take-down. It is automatic in that the recoil is used to move the breech block to eject empty shell, cock the firing pin spring and introduce fresh shell into barrel. Just pull the trigger. Specifications: 36½ inches; barrel length, 19½ inches; weight, 4 lbs. 1 oz.; holds eight .22 long rifle cartridges.

SAVAGE Model 29 Repeating Slide Action Rifle

TAKEDOWN MODEL 29-.22 Caliber - Rim Fire - Repeating Slide Action Rifle

MODEL 29

Here's the most popular "22" rifles ever built—the Savage Model 29 slide action repeater. The short forearm stroke (slide travels only 11/2-inches in loading and ejecting) permits rapid fire shooting without disturbing aim.

Barrel-Round, Tapered, 24-inch with crowned muzzle. Chambered for .22 Long Rifle regular or high speed cartridges. .22 Long, or .22 Short also may be used.

Action—TAKEDOWN RECEIVER. One-piece bolt easily removed for cleaning. Short fore-end stroke ejects and loads. Positive operation. Push button type safety at rear of trigger guard. Tubular magazine: capacity, 14 Long Rifle, 16 Long or 20 Short

Stock and Fore-end—Selected walnut stock, full pistol grip, corrugated butt plate. Extra long walnut fore-end, grooved. Sights—Metal Bead Front Sight and open Middle with elevator.

Weight-About 53/4 pounds. Length over-all 41-inch.

Model K8 and K10 Weaver-Scopes are relatively high-power scopes for specialized shooting, yet despite their high power, they are sturdily built, and can be mounted with rigid mounts, such as the Weaver Detachable Mount, and used in the field under roughest conditions. The large 34 mm. objective lens has graduated range focus adjustment; internal windage and elevations adjustments are ¼-inch click type, with screw caps that protect against accidental change. The eye relief is long, to permit use of the scope with high power rifles.

WEAVER KV SCOPE

23/4 to 5 POWER \$68.50

DELIVERED

Power of the KV Weaver-Scope is changed by a twist of the knurled knob, with a choice of either 2¾X or 5X, which makes the scope suitable for nearly every kind of shooting. Other important features are: Coated lenses for maximum light transmission; large objective lenses; ¼-in. click elevation and windage adjustments of guaranteed accuracy, no loose joints — sealed against moisture; sturdy construction for roughest usage.

Choice of Experts Everywhere

The Country's leading arms authorities, after comparing and testing many scopes, report that K Models are the finest ever made. Along with Weaver-Mounts, they are the choice of experts who want reliability and top quality above everything else. The secret of this select quality at moderate price lies in advanced lens making technique, precision production methods, simple design, and years of experience.

BOONE SCOPES

4 POWER

The flexible eye position, short length and bright image of both the Boone-4 and Boone-21/4 are made possible by a unique optical system which includes four mirrors to erect the image instead of the usual four erecting lenses, giving great brilliance of image because a minimum of light is lost passing through the system. Objective lenses are precision ground and polished from highest quality optical glass. Eye lenses are three-element Hastings-type, noted for flat field and excellent definition. All lenses are hard coated.

Mechanically, the Boone scopes include these features: Die cast magnesium alloy main body for greater strength and hardness, lens cells precision machined from aluminum alloy bar stock, all screws specially made from alloy steels and case hardened.

21/4 POWER

This close coupled prismatic Boone 4X telescope will fit in your pocket, yet can be slipped on the mount in seconds and zeros in every time. It is deadly accurate and is the hunting scope where 4 power magnification is needed on long shots or for varmint shooting. The Boone 4X eyepiece tube comes back to perfect eye position and the image is brilliant and sharp. 28 foot field at 100 yards. Eye relief 3-inches. Top Mounts On Top Ejection Rifles. With the Boone Scope the iron sights are instantly available in emergencies. Also the Boone Receiver Sight is available, which is interchangeable on the sam mount. With this most efficient combination of sights you have your choice of scope, receiver sight or iron sights-instantly available.

BOONE-4 Power Specifications

Of course you are welcome to order Scopes to be mounted on your own rifle. For guaranteed satisfaction we strongly recommend that you forward your gun to us at 277 Rupert Ave., Winnipeg, and we will have the work done for you, usually within 2 days. In this case, the charges are as follows to install our Scopes and Mounts on your high power rifle \$4.50 or on your .22 calibre rifle \$3.50. If your 22 rifle will take the new Weaver Tip-Off Mount there will be no charge

for installation.

Weaver, K or J Detachable Mounts

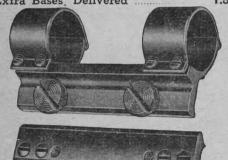

TOP DETACHABLE
Both Weaver Top and Side detachable mounts are on entirely new principle. An accurate V locating surface with an angular welding surface that binds the V's of the base and the upper into a sold, rigid unit. V locating surfaces are the most accurate known and assure perfect precision in retaining the scope to the rifle. Each champ ring has two hardened screws. Experience has shown that two are needed to hold a scope immovable under recoil and rough use.

Off and on in a second. Extra bases available for use of same scope on several rifles.

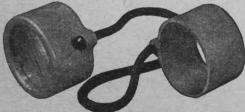

The Side Detachable Mount is specifically made for those rifles having top ejector or when there is no room on the top of the receiver to take the Top Mount Base.

Either Mount Complete with Rings and Bases, Delivered 12.00 Extra Bases Delivered ...

SIDE DETACHABLE

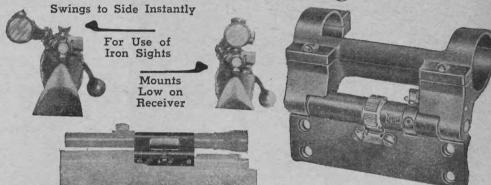

WEAVER LENS CAPS

Distinctive in design and manufacture, Weaver Lens Caps bring the shooter a measure of practical protection for his scope lenses. They are made of metallic gray plastic and fit snugly over the ends of the scope. Transparent windows in the caps permit emergency use of the scope without removing the caps. State power and model scope when ordering.

OLYMPIC BINOCULARS

10 x 50 C.F.

We have tested these binoculars and we are sure that you will find them as we did TOPS in their field. They are built to give you years of pleasure and usefullness. All lenses are coated.

What is Coating?

Each air-to-glass surface in an uncoated binocular reflects some of the light passing through. Altogether, almost half the light entering the binocular is lost. A further reduction in binocular efficiency results from the reflected light, which bounces from surface to surface and reaches the eye as "haze" inside the binocular, causing the image to appear less clear. By applying a thin (four millionths of an inch) special transparent coating of magnesium fluoride to the air-to-glass surfaces, the light loss is cut as much as 50%. This eliminates annoying reflections; permits greater light transmission, and makes images needle-sharp under most adverse lighting conditions.

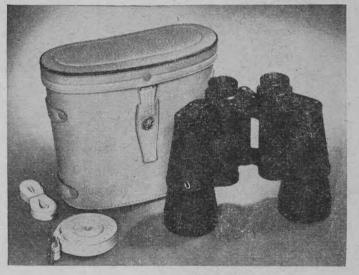

NOTE:

All Olympic Binoculars come in either Centre focus or Individual focus except the 6×15 . The Centre focus binocular is adjusted by a central knurled heel on the centre post whereas the Individual Focus binocular is adjusted by turning either eyepiece. By each listing of the binoculars we have noted I.F. or C.F.; I.F. for Individual Focus or C.F. for Central Focus.

All binoculars come with fitted leather case lined with felt, case carrying strap and binocular carrying strap. All binoculars except the 6 x 15 come with plastic dust covers for lenses.

LYMAN RECEIVER SIGHTS

Lyman Sights all have the following features which are there to assist you in finding your target quickly and get a clean kill or perfect bullseve.

1. Quarter minute micrometer click adjustments for both windage and elevation free of lost motion. This means that each click will move the center of a group of shots 1/4-ins. at 100 yards with a 30-in. sight radius, standard for most rifles.

2. Quick Release of slide assembly. This feature allows instant change from scope to iron sights without having to realign the rifle. It also saves wear and tear on the elevation screw threads during installation. It offers the only absolute foolproof method of keeping your sights in perfect alignment. Simply remove the slide from the base, away from all prying fingers, coins, and screw drivers until ready for instant use.

3. Dovetail slot insures maximum strength and accuracy. An accidental blow on the windgauge arm will put no pressure on the elevation screw. Accuracy is maintained throughout the full height of the staff. All bases and slides are individually

hand fitted and are not precisely interchangeable.
4. Adjustable zero scales are provided for both windage and elevation. These scales are marked in three minute graduations, representing one full turn of the adjusting screw or twelve

5. Adjusting Knobs are marked for minutes and quarter minutes. All graduation markings on the target knobs are in clear black figures on highly polished surfaces, plainly visible. The Stayset Knobs, popular with hunters, have their graduations in a dark background to eliminate reflection. The coin slots of these Stayset Knobs are deep enough to allow good

purchase with any small coin, key or screw driver.

6. Elevation Stop Screw for locating elevation zero is provided for use in connection with the quick release feature.

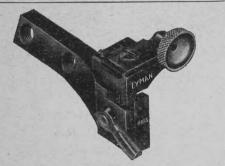

48WJS for Winchester model 70, 54; Remington model 721, 722. These rifles are drilled and tapped for this sight.

Delivered \$16.9

48FN for FN Mauser - Husqvarna. Drilled and tapped for this sight.

Delivered \$16.95

GENUINE BUCKSKIN JACKETS

THESE JACKETS ARE EXPERTLY TAILORED of soft, pliable, domestic deerskin, heretofore available only on custom order. The finest procurable.

Styled authentically in either Western or plain fashions, they are the last word in comfort, and fit and feel like a soft glove. Will wear! and wear! and wear!

Ideal for any sport, plain loafing or everyday wear. It is difficult to describe the luxurious feel of this soft, smooth BUCKSKIN. It's the leather our Frontiersmen chose for their clothing because of its serviceability and comfort and not to be confused with or compared to ordinary leather jackets. ORDER BY NUMBER and specify size. Your suit coat size or your chest measurement is sufficient. These fine jackets actually cost you less than if you had them made from your own skins.

MODEL

Conservatively fringed as shown. Bucktan color goes well with anything. Ideal for riding and all sports. Well-styled, good-looking. A welcome addition to any wardrobe. State size when ordering.

Each. Delivered

Per Pair

Delivered

Women's Buckskin Moccasins

Same as above, but made in Buckskin with beaded tops. Sizes 3-10.

Per Pair Delivered

MODEL 1245

This is truly an "Old West" style Buckskin Jacket. It is a replica of the Buckskin Shirt worn in the frontier days. Styled from data and pictures of the clothing worn by our pioneers, it resembles closely the old-time Buckskin outer garment. While retaining the appearance of the Buckskin shirt of the early days, this jacket has been styled into a very comfortable garment. Covered extensively in fringe, it is truly the most "Western" of all jackets. The Buckskin lace and zipper combination allows for putting on like a regular jacket, at the same time retaining the appearance of the old Indian Scout Shirt.

Length 31 inches. Lined—very comfortable and warm. State size when ordering.

Delivered \$49.50

LADIES' MODEL 1600

Same description as Men's Model 1245. Full fringe jacket. State size.

Delivered \$48.50

Buckskin Hunting Glove

Perfect for all outdoor use, and dress wear. Top quality. Sizes: - 11.

Pair Delivered

OLT'S BIRD CALLS

OLT'S DUCK CALL

OLT'S NEW IMPROVED MALLARD AND DUCK CALL is a compact and handsomely designed pocket-size call. Precision made. Easy to take apart, clean, and reassemble quickly without loss or change of tone. The choice of the most discriminating duck hunter who wants the "true-life" tone of wild mallard duck built right into a call.

OLT'S GOOSE CALL

OLT'S PERFECT GOOSE CALL is hand-made of the very finest hard black rubber . . . nicely polished. Nothing whatsoever to get out of order, because there is nothing to keep in adjustment. Has the new Olt feature of "screw-in" assembly, can be taken apart, cleaned, and reassembled without loss or change of tone.

OLT'S CROW CALL

OLT'S PERFECT REGULAR CROW CALL is made of fine polished hard rubber throughout—reed is held securely in place between two hard rubber lips which constitute the mouthpiece. Wide groove in reed base eliminates possibility of reed sticking. Blows with extreme ease. Excellent tone, raucous and far carrying. Vest pocket size.

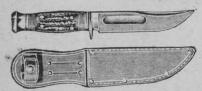

CROW-TONE CROW CALL

Here is an inexpensive Crow Call made of wood with a very fine reed. Will give you the same tones as more expensive calls.

DUCK and GOOSE DECOYS

Duraduck decoys

SFLF-INFLATING ALL-RUBBER

All-rubber; easy to carry, self - inflating,

Each Delivered 2.75 Six Delivered 15.90 Special Per Dozen Delivered 30.00

Mouth Inflating All-Rubber

Can be used for stubble and water shooting made of natural rubber. Collapsible, enables you to carry a dozen or so in your hunting jacket pocket. Life-like in size and natural wildlife colors.

Each Delivered 1.25 Six Delivered 7.25 Special Per Dozen Delivered 13.75

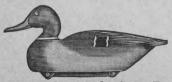

VICTOR VERI-LITE

Lightweight hollow fibre decoys with solid molded bottoms, withstands water indefinitely, sturdy and durable, float with the breeze, balanced to right itself on water. Gun shot will not sink them. Patterned from live specimens. Hand painted with glass eyes, anchor hooks installed. Weight approximately 14 lbs. to the dozen. Packed 6 drakes, 6 hens.

Each Delivered 1.95 Six Delivered 11.25 Special Per Dozen Delivered 21.50

VICTOR MAJESTIC

Oversize Mallard decoy made of pure Tenite finished in permanent non-glare colors. Self-righting; internal weighting eliminates need for body weights. Heads can be adjusted to suit the hunter. A completely realistic, water-proof, decoy that rides perfectly in calm or rough water. Packed 6 drakes, 6 hens.

Each Delivered 3.30 Six Delivered 19.50 Special Per Dozen Delivered 36.00

You shake out a DEEK and toss it on the water. It inflates instantly! A whole flock is afloat in two minutes time. Anchors and cords fall out without tangling.

2. COMPAC

When not in use, DEEKS collapse and can be folded into a small bundle, a feature that makes it possible to carry a dozen or so in the pocket of a hunting jacket.

3. TOUGH

Made of durable natural latex rubber, DEEKS will last indefinitely. They are non-puncturable at normal range. No breakable heads.

4. LIGHT WEIGHT

A DEEK weighs less than six ounces. A pocketful of DEEKS weigh less than a single unit of the elaborate, conventional This extreme lightness permits multiple use of each anchor, if desired, and makes carrying DEEKS a pleasure.

PERFECT DECOY &

5. LIFELIKE in SIZE and COLOR

DEEKS, molded in detail and painted in natural, wild-life colors, have NO GLARE OR SHINE. Eyes, feathers, wings, etc., are designed in relief. DEEKS weather-vane naturally in the wind, and ride high or deep, as desired, with perfect action in all weather conditions. Design of stem and ballast prevents unnatural side-rolling or whipping back and forth. Rust-proof metal ring in stem serves as keel to insure perfect poise in the water.

Each Delivered ... Six only Delivered
Special Per Dozen Delivered 9.00 16.25

ROYAL BRAND DUCK

The Perfect Decoy For Stubble Hunting

Natural in design. Natural in color. Made of heavy gauge metal. Lower end is pointed for easy staking into the ground. Length over all 12 inches.

4.25 Six Delivered

DUPE GOOSE

Each Del. 2.25 Six Del. 13.25

Special-1 doz. Del. 25.00

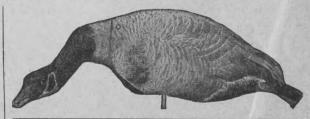

DUPE-A-GOOSE DECOYS fold completely flat for easy carrying yet a snap of the simple built-in spreader and they are a full-bodied decoy. All Dupe-a-goose decoys are actual photographic reproductions of Canada goose and are completely natural in shape and color. They are constructed of tough, water-proofed fibreboard and their specially treated dull finish reduces glare to a minimum. Supplied in 9 regular and 3 feeding positions.

VICTOR GOOSE DECOY

Full body goose decoy made of paper mache. Removable head and stake for easy packing. Light and compact for carrying. One of the best decoys we have seen for a long time.

Six Del. 17.45 Each Del. 2.95 Special Per Dozen Del. 33.50

SHOOTERS PLEASE NOTE:

For best results use a combination of Duck Stubble Heads and Goose Decoys. Place Goose Decoys about 10 to 15 yards in front of Pit or Hide, and Stubble Heads at about the same distance at the rear of Pit or Hide. The Goose Decoy will attract the Ducks from a distance and height. As they approach closer they will always land towards the Stubble Heads. This method will bring in Ducks to you anywhere on the field they are feeding in. Pits are best for Stubble Shooting, for either Ducks or Geese.

PACHMAYR POWer-PAC

PACKED WITH POWER

for more "kills"... perfect shot patterns greatest recoil reduction

New in design . . . proved in performance . . POWer-PAC gives killing power of a gauge larger and the comfort of a gauge smaller. Scientific design of gas-ports removes sharp crack of muzzel blast so annoying to many shooters. Look at these exclusive features . look at the photographic proof, and you will readily see why the POWer-PAC is rapidly gaining a permanent position with shooters all over the country.

Each tube bored to precision standards for specified use . . over 25 tube designs tested to arrive at these three:

SHORT RANGE for 30 inch circle at 15 yards for skeet and close upland shooting. MEDIUM RANGE for 30 inch circle at 30 yards for deliberate skeet shot, traps and general

LONG RANGE gives 30 inch circle at 40 yards yet holds pattern out to 60-80 yards for wild fowl.

12-16-20 GAUGE

INSTALLED COMPLETE

If you wish your own gunsmith to instal the POWer-PAC on your shotgun please state make. model and gauge of your gun and note if it has a raised rib.

Delivered \$19.95 (not installed)

CANNOT SHOOT LOOSE

Adapter ring permits adjustment of sight on top-center barrel . . . tightening and locking ring against body prevents shooting loose.

TUBES NEVER FREEZE

Machined shoulder protects threads from dirt . . . the tubes never freeze in place

INVERTED TUBE DESIGN

Keeps gas out of shot column be-cause shot is in tube before wad is out of barrel...less deformed shot because shot can't spread out in attachment body . . . plus many other advantages.

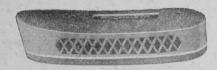

TUBES SAME LENGTH . . . Gun Balance Never Changes

Shooters stay "in the groove" with their swing because tube length and weight of muzzle remain constant. Better appearing, too.

- Anti-Recoil and Shot Control device for Single Barrel Shot Guns.
- 9 3 Tubes, Short, Medium and Long Range.
- Belt Carrying Case and Wrench.

PACHMAYR DELUXE RECOIL PADS

FIELD MODEL—Shape, construction and hardness are the result of years of experience and field testing of various models with hundreds of shooters. While first designed for shotguns, the Field Pad is equally efficient on larger caliber rides to reduce recoil as well as providing a non-slip surface against the shoulder.

XXXXXXXXX

SKEET MODEL-Design is based on exhaustive testing at skeet shooting and with skeet shoot-ers..., resulting in a superior shaping that has a "just right" feel for both comfort and fast gun handling.

Each, Delivered

TRAP MDDEL—Trap shooting requires a different shape in a Recoil Pad for accurate repeated shoulder positioning and maximum recoil reduction. Leading trap shooters prefer Pachmayr Trap Pads because they best provide these features.

Each, Delivered

LIGHT WE

FIELD MODEL—Has a finely checkered surface for fast gun handling without slippage at the shoulder. In red, brown.

Each, Delivered

stock length desired.

PACHMAYR GUARANTEE

PACHMAYR Deluxe Recoil Pads are made of Neoprene rubber . . . not affected by oils, solvents, water, temperature or sun . . . not hardened by age or cold weather nor softener by hot weather. Guaranteed, not just for years, but for the life of your gun.

Please state make and model number of your gun when ordering Recoil Pad so that we can

If you wish our experienced gunsmith to fit and install one of these Recoil Pads, a small charge of \$2.75 is made for this work. Please state

send the right size pad to you.

MANAMARAMAZ

SKEET MODEL—Has a sunken, ribbed surface with no protection toe. Designed for the fast action skeet shooting requires. In red, brown.

Each, Delivered

Jostum Monte Carlo Pad—Makes your gun stock more straight by decreasing drop of stock. Pro-tects cheek from recoil. Moulded rubber cheek pad enclosed in smooth leather. Seven inches

No. 4, ½ inch high. Delivered...... No. 5, 34 inch high. Delivered 6.75

SLIP-ON PAD

Made of natural rubber in red. Easy to slip-on to the gun butt. Has an amazingly good recoil absorption quality due to honeycomb design in the butt section. Live rubber ribs give an even distribution of recoil force over the entire butt of the pad, provides a resistance to recoil force and serve to act as baffles to trap air in separate air cells. The result is a dampening action that gives the shooter a feeling of gun push rather that a sharp blow.

Ribs in the Pachmayr Slip-On pad are slanted to keep the gun from slipping when it recoils, making for more accurate shooting and greater

Magic Gun Blue

A new cold chemical gun bluer that penetrates the steel and produces a beautiful, tough, blue black finish that will not rub off. Not necessary to dismantle gun. Anyone can easily reblue a gun in a few minutes' time. Skill is not a factor, the chemical does the work. Every shooter needs a bottle. This "Handy-Andy" solution rates a favorite spot for touching up sights, screws, scratches, bare spots, etc., as well as for an entire blue job. 2-oz.

WILLIAMS AUXILIARY HAMMER EXTENSION

For Use with Winchester or Marlin Rifles when a Telescope is Being Mounted

Much more positive . . . faster and safer . . . a must when a telescope sight mounts over the hammer, and necessary when eye relief is critical. Not a gaget, but an improvement that gives absolute hammer control, more speed. Easy to install—just one set screw. Spot indenture in hammer with punch or drill. Excellent for either right or left-hand shooters.

When ordering please state make and model of gun, and whether you shoot right or left hand. Saves pinching finger, when half cocking hammer manually.

IDEAL" RELOADING TOOLS

IDEAL QUICK LOAD SET

This set was designed to produce large quantities of accurate ammunition in a short time. The complete set of dies are mounted in the turret head and, when progressing from one stage to the next, the reloader merely rotates the turret to bring the desired die into operation. An added advantage of this set is that the dies need only be adjusted once—they do not lose their setting as do dies that are removed and re-installed in other makes of tools.

Set contains: The Ideal True-line Jr. Reloading Press, a complete set of dies for one particular caliber; an Ideal No. 55 Micrometer Powder Measure; the latest edition of the Ideal Reloading Handbook; and two supplements, Nos. 1 and 2, issued by the American Rifleman Magazine. Set of dies consists of: Shell Holder; Priming Punch, Double Adjustable Chamber, Bullet Seating Screw, Comb. Muzzle Resizer, Comb. Decaping Rod, Comb. Expanding Buttons.

NO. 310 HANDTOOL

\$51.50

The No. 310 Tool is the lowest priced tool available which performs all reloading operations on metallic pistol or rifle cartridges. For any given cartridge, a No. 310 Tool Set consists of the following: Handles, Adapter Die, Decapping Chamber and Rod, Muzzle Resizer, Shell Expanding Chamber and Plug, Priming Chamber, and a Double Adjustable Chamber with Bullet Seating Scrow.

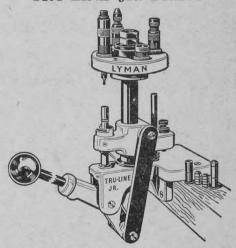

Screw.
The No. 310 Tool Handles are now equipped with an adjustable extractor hook so that many types of rimmed or rimless cases can be processed in the same handles. (See Quick Reference Chart). The adjustment is made by simply screwing the adjusting screw in or out to accommodate the head of the shell. A lock nut keeps the screw firmly in position.
The Adapter Die allows many cartridges to be reloaded in the same set of handles, since a correct-size adapter is furnished with each set of different caliber dies. This adapter screws into the inside top portion of the threaded chamber of the handles.
For the shooter who is interested in doing a moderate amount of reloading with as little investment as possible, the No. 310 Tool and Dies are the answer.

are the answer.
Please state caliber when ordering.

C-H RELOADING TOOLS

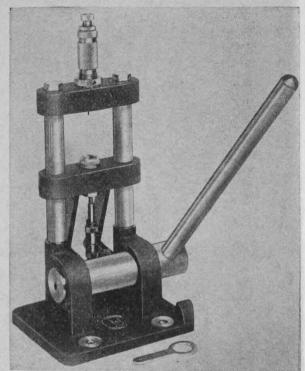

C-H Magnum Reloading Press

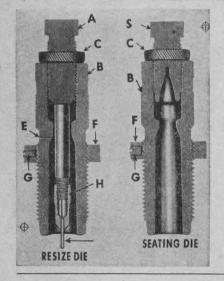

Complete for One Cal., Delivered . \$57.50

The C-H Magnum Press is designed to incorporate maximum strength with positive alignment. Always keeping in mind the reloader's requirements by eliminating luxury features, slight in value, but substantial in cost, and concentrating in the vital factor of construction, we are able to deliver this precision instrument at moderate cost. The C-H Magnum Press is of simple rugged design, particularly adapted to heavy operations requiring a high degree of accuracy. The two upright posts assure positive alignment of the case holder to the die. The thrust of the tool is located directly under the case holder, thereby eliminating any possible distortion of the slide due to spring. The upright columns are ground and chrome plated to give lasting wear and corrosion resistance. The stroke of the tool is 3% inches which is more than adequate for loading the longest cases. The priming arm has an adjustable stop that may be used to contral the exact seating depth of the primer. All these features add up to making perfect ammunition that is uniform in every way, and truly a credit to the handloader.

All prices below are delivery charges prepaid.

C-H Shell Holder

C-H Precision CHROME Plated Loading Dies AVAILABLE IN OVER 300 CALIBRES

All C-H dies are chrome plated to give lasting wear resistance and corrosion protection. The chrome reduces wear, prevents scratching and reduces friction. The super-finish given the dies makes them work easier and last longer than any die ever before produced. C-H Dies perform a minimum of swagging on brass fired in properly dimensioned chambers, thus assuring maximum case life. The outstanding degree of concentricity maintained during manufacture insures that cases will possess absolute alignment of body and neck which is essential for bench rest accuracy. C-H precision chrome plated dies will reform brass to the minimum chamber as specified by the Sporting Arms and Ammunitions Manufacturers Institute. The C-H precision chrome plated dies are available in over 300 different calibers for both rifle and pistol. Only the dies for pistols and rifles with tubular mabazines are available with crimp seating dies,

REDDING POWDER SCALE

Engineered and designed to meet the needs of the great army of hand-loaders, the Redding scale combines accuracy and ease of operation to an unequalled degree. These features plus attractive appearance and low cost make it the logical choice of beginner and veteran reloader alike. The sturdy brass beam is clearly graduated each side of the main bearing—each graduation at left equalling five grains and each graduation at right equalling one-tenth grain, for a total capacity of 325 grains. Pointer at left end of beam indicates a tenth grain over and under scale—eight-tenths each side of zero.

Counterpoises are of solid brass, uniformly adjusted. All bearings are hardened and honed and are completely self-aligning, eleminating rubbing and side friction. Pan and hook are burnished aluminum and base is cast iron finished in brown wrinkle enamel and is provided with leveling screw. Each scale is individually tested and adjusted against U.S. Bureau of Standards approved master weights and guaranteed accurate to a tenth grain. Packed in strong, reinforced box with simple directions for assembly and operation.

Special, Delivered

PACIFIC POWDER SCALE

An inexpensive but highly accurate powder and bullet scale this Pacific model has been cleverly designed, and is very easy to operate.

Pacific grain weight are highly accurate, being checked three separate times during manufacture. With the combination offered with the scale any desired weight may be obtained up to 61.9 grains. A set consists of four 1/10ths, and one each of ½, 1, 2, 3, 4, 5, 6, and two 20 grain weights.

This scale utilizes the Substitutional Method of weighing; the desired weight is placed in the pan and the beam is carefully balanced by moving the balance nuts forward or backward. When the beam is perfectly balanced to coincide with the indicator, the balance nuts are locked in place by tightening them again each other. Remove the weights from the pan and the scale is ready to turn out extra powder charges indefinitely. Price, complete with one set of weights.

Special, Delivered

RIFLE SLINGS

MILITARY OR SLIP FIT

Ea. Del.

Regulations! Strong, sturdy and dependable. Its two sets of claw hooks permit very fine and speedy adjustments in length. This type of sling is paraicularly adapted for use with the heavier target rifles and is a great favorite with men accustomed to the regular U.S. service rifle. It is recommended to riflemen wishing a particularly sturdy, reliable and foolproof stap. 1¼-inch wide.

ONE PIECE" ADJUSTABLE

A very serviceable and inexpensively priced item for the man who wants a combination carrying strap and adjustable sling yet who does not feel the need of its being speedily detachable.

RUGER PISTOLS STANDARD MODEL

DELIVERED

22 CALIBRE LONG RIFLE

DELIVERED

An outstanding characteristic of the Ruger is its cylindrical bolt which moves in a heavy tubular receiver. This construction provides safety and strength, together with outstanding accuracy, since the rear signt does not move with the bolt and the breech is entirely enclosed. The receiver is fastened strongly to the grip frame by means of heavy steel lugs which are rigidly locked when the gun is assembled, but which may easily be disengaged without tools for cleaning or inspection. No screws whatever are used, except for the attachment of grip stocks. In every structural detail this pistol exemplifies the very best in firearms design and on every basis by which fine guns are judged the Ruger is the greatest han lyun development in decades.

Calibre: .22 Long Rifle only, high velocity or regular velocity loading.

Barrel: Length, 434-ins., medium weight, 6 groove rifling, 14-in, twist permanently assembled to receiver by 20 pitch screw threads.

Weight: 36 ounces. Overall Length: 834 inches.

Sights: Fixed, wide blade (.093-in.) patridge style

front, precision machined, square notch rear. Sight radius, $7\frac{1}{2}$ -in.

Magazine: Detachable, 9 shot capacity.

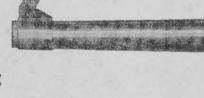

Safety: Lecks sear and bolt. Cannot be put in safe position unless gun is cocked; marked to show position. May be used to lock bolt in open position.

Finish: Polished all over and blued.

MARK

22 CALIBRE LONG RIFLE

DELIVERED

A companion piece to the RUGER Standard model, the Mark I has incorporated the tried and proven mechanism of the Standard RUGER into a specialized design for competitive target shooting. For this type of shooting the RUGER Mark I repre-

sents the most advanced design available today. Its inherent accuracy far exceeds accepted standards. Its handling qualities approach perfection and its mechanical reliability is above question. Yet with all its target gun qualities, the Mark I retains the handsome characteristic RUGER appearance.

Nationally known champion shooters, and firearms experts writing for the leading sporting publications have tested this gun and confirmed its remarkable performance.

Calibre: .22 Long Rifle only, high velocity or regular velocity loading. Barrel: Length 6%-inches, heavy weight, 6 groove rifling, 14-inch twist, burnish reamed, permanently assembled to receiver by 20 pitch screw threads.

Weight: 42 oz. for 6%-inch barrel.

Overall Length: 10%-inches.

Sights: Patridge style front blade .125-in, wide. Micro rear sight, click adjustments for windage and elevation.

Magazine: Detachable, 9 shot capacity.

Safety: Locks sear and bolt. Cannot be put in safe position unless gun cocked; marked to show position. May be used to lock bolt in open position.

Finish: Polished all over and blued.

NOTE: When ordering a revolver or automatic pistol please include form 76B which can be easily obtained on request from your local police chief or constable.

WEBLEY AIR PISTOLS

WEBLEY SENIOR MODEL

The WEBLEY "SENIOR" AIR PISTOL is our latest Model de Luxe. Adjustable Backsight; fitted with a special sear mechanism, which ensures a light pull-off and obviates the necessity of a trigger adjusting screw. The cocking of the Pistol by means of the barrel has been enormously facilitated by the addition of a PATENT double joint, which assists in the leverage to such an extent that any young person can easily operate it. The top catch of the "Mark I" is replaced by a Webley Revolver stirrup, this giving an absolute and positive lock. The barrel has been considerably strengthened. Piston is fitted with special Metal Ring in place of Leather Washer, giving increased velocity and durability. Use Webley Oil. The butt of the Pistol is serrated to ensure a perfect grip. Weight, 33 ozs. Length overall, 8½ inches. Length of Barrel, 6½ inches. Machine Cut Rifling.

WEBLEY JUNIOR MODEL

The WEBLEY "JUNIOR" AIR PISTOL offers the best opportunity The WEISLEY JUNIOR AIR FISTOL offers the best opportunity for boys, through their own earnest endeavours, to become crack shots. It teaches steadiness of hand and eye, and is a faultless practice weapon which can be used in room, hall or garden with perfect safety. Weight of Pistol, 24 ozs. Length overall, 7% inches. Length of Barrel, 6% inches. Smooth bore.

INCREASE YOUR CATCH with the Finest Lures Made

Sydney's SUPER BAITS

These Baits are the result of years of experiments in an effort to determine the most effective decoys for various fur-bearing animals. Our idea is to give you baits that will increase your catch of furs, for we know that the more fur you catch the more you can ship to us. Further, we know that if we can furnish you better lures than are usually sold, you will appreciate our efforts. For this reason we have provided the best baits that science and skill can produce, and offer them to you solely with the idea of getting your business in fur shipments.

We are so confident that these baits will produce results for you that we offer them to you on money-back guarantee. We allow you to try them at our risk, and if they do not increase your catch of raw furs, you can send them back and get every penny refunded. We want you to be as fair with us as we are with you. We do not claim these are magic preparations that will drag animals into traps.

PASTE BAIT These paste baits are made under a patented process, so they withstand rain, snow, sleet, etc.

—a feature found in no other decoys. Therefore

—a feature found in no other decoys. Therefore they are economical to use.

ANIMAL BAIT—For all flesh-eating animals.

BEAVER OR MUSKRAT BAIT—For all water animals.

TRAIL SCENT—For making trails fur-bearers will follows.

KILODOR—Destroys human scent on traps which animals can detect and avoid. Does away with all smoking and scouring of steel traps.
